Beschrijf wat je **ziet** op dit plaatje en wat je denkt dat er zal **gebeuren**.

La scène se passe dans la cuisine familiale. Maman est en train de faire la vaisselle et elle ne remarque pas que son évier déborde alors que le robinet est ouvert. Dans son dos, les enfants tentent de prendre des bonbons dans l'armoire. Le garçon est monté sur le tabouret et a ouvert la porte de l'amoire supérieure de la cuisine. La petite fille le regarde debout devant lui. Elle tend la main vers son frère qui a puisé un biscuit dans le bocal. Mais le tabouret bascule en arrière.

Ce qui pourrait advenir de cette situation? Tout d'abord, les inondations de l'évier pourrait causer des soucis aux différents meubles en bois (gonflement des boiseries) et même du sol s'il s'agit du parquet.

Mais le plus important, les enfants pourraient être en péril. Le tabouret basculant en arrière, le garçon va tomber peut-être en arrière aussi. Il pourra se cogner contre le meuble derrière lui et avoir encore plus de mal. La petite fille ne pourrait pas assez vite lui venir en secours.

Introduction
For several years, the Intersteno competition is criticized by some national delegations or by some competitors who consider that the texts being used for the competitions are not fair from one language to the other one.
They indeed consider that, according to the language of the competitor, the wanted performances are not equivalent, which deprives inevitably some competitors of an award they consider nevertheless they deserve.
Some national delegations ended boycotting the competitions. Other dissatisfied countries following their exemple would lead to the end of the Intersteno competition by lack of any interest, and the Intersteno congress itself would be threatened there.
The role of an international organization such as Intersteno is certainly not to exclude languages or countries of its activities, but on the contrary to gather all the nations in a community, so that they participate in the same run-up and in the same dynamics.
In the absence of technical, logical and understandable explanations on the current
